

NEW TECHNOLOGIES AND EXHIBITORS COMING TO FASTENER FAIR FRANCE 2020

Market leaders [Gardette Groupe](#), [Titgemeyer GmbH](#), [Acton](#), [Schäfer + Peters France](#) and many more are bringing innovative fastener technologies to Fastener Fair France in May, reflecting the rising fastener demand and new trends in the automotive, aerospace and construction industries.

Surging demand attracts key exhibitors

French companies [Rabourdin SAS](#), [SIMAF-CFF](#) and [Satinox Assemblage](#) are taking advantage of the new **Aerospace Hub** at the show, encouraged by the estimated 24% surge in demand for aerospace-grade fasteners by 2025. [Traxx](#), an expert in bolt tension, will be there too, looking to meet global players like [Airbus](#), [Align Aerospace](#), [Arconic](#), [Dassault Aviation](#) and [Thales](#) who visited the exhibition in 2018.

New exhibitors are also signing up, including [GESIPA](#), an international expert in blind rivet technology, [Dytsa](#), a Spanish manufacturer of high-tensile fasteners for the automotive industry, [NOF Metal Coatings](#), the inventor of zinc flake anti-corrosion coatings, and [Fastenex](#), a group of six Spanish manufacturers of standard and special fasteners for the automotive, railway and construction industries.

With France being Europe's second largest market for fasteners after Germany, and sales set to climb 3% annually until 2025, there will be many innovative technologies at the event, reflecting moves towards a low-carbon, digital future for the manufacturing industry.
